

Knee Surgery After Care

Extracapsular Lateral Sling Technique (CCL) Repair Recovery

Columbia Veterinary Hospital
576 31st St Astoria, OR 97103
(503) 325-2250

Instructions:

This procedure requires strict rest for about 3 months!

Month One: Kennel/crate rest is needed with very short leash walks only to go to the bathroom outside.

Month Two: Short leash walks are allowed for a distance of 1-2 blocks by no more at this time.

Month Three: Leash walks are still needed, but your pet may be allowed to go longer distances depending on how well your pet is using its leg at this time.

Failure to follow these guidelines may result in re-injury or may cause hardware to fail!
